

ARAXIS FOLDER SIZE EXPLORER

The screenshot shows the Araxis Folder Size Explorer application window. On the left, a folder tree is displayed with blue progress bars indicating the size of each folder. The main pane shows a list of files with columns for size, kind, and path. Several callout boxes provide instructions: 'Drop folders here to begin, then select one or more folders to work with their contents' points to the folder tree; 'Only show items larger than this size' points to a filter dropdown; 'Only show items with names containing this text' points to a search field; 'Act on items selected below' points to the file list; 'Add or remove folders' and 'Act on selected folders' point to buttons at the bottom left; and 'This tab level on the left, and 'Filter' points to a tab in the main pane.

Find and manage the **folders/files** consuming your drive space

FOR MAC OS X

BUY NOW FROM THE MAC APP STORE

Efficient

Quickly identify the folders and files using the most disk space.

Effective

Preview using Quick Look and, if you're sure you no longer need items, move them to Trash.

Elegant

Intuitive, minimistically elegant presentation. Size bars show at-a-glance the relative sizes of sibling folders.

Fast

Highly optimized scanning of single or multiple folder trees, even with hundreds of thousands of items.

Focused

Show only those files larger than a certain size, or whose names contain specific text.

Flexible

Work with network shares, as well as internal and external drives.

Convenient

Select one or more folders to see *all* the items contained within them and their children in one convenient list, sorted by size.

Integrated

Show or open files with Finder. Supports Retina displays, OS X fullscreen mode and resume.

Automatic

Scan results update automatically if you make changes to your local drives outside of FSE. No need for manual refresh.
