

ARAXIS FIND DUPLICATE FILES

The screenshot shows the Araxis Find Duplicate Files application window. It is divided into two main sections: '1 Choose what to scan' and '2 Work with scan results'. In the first section, folders like '/Users/djn/Examples' and '/Users/djn/Pictures' are listed. A preview window for 'Spread Wings.jpg' shows a seagull in flight. The second section shows a list of files with their hashes and modification dates. A table of hashes is visible on the right side of the interface.

Find & manage files with duplicate content, regardless of name

Efficient

Quickly and robustly identify files with duplicate content.

Effective

Preview items and, if you're sure you no longer need them, send to Trash or move to another location preserving their folder hierarchy.

Elegant

Straightforward results – view all scanned items, items with duplicates, first or other occurrences of each duplicated item, or items without duplicates.

Fast

Highly optimized scanning of single or multiple folder trees, even with hundreds of thousands of items.

Focused

Optionally restrict scanning to particular file types (e.g. .wav, .mp3, etc.).

Flexible

Work with network shares, as well as internal and external drives. Scan multiple folders in one go.

Convenient

Built-in preview of selected items and their duplicates.

Integrated

Preview files with Quick Look. Show or open files with Finder. Supports Retina displays, OS X fullscreen mode and resume.

Advanced

Last resort 'Put Back' capability for moved items. Save scan results to a text file.
